## 9. Objectives of the Academic Program

- 1. Preparing a generation of teachers and teachers for intermediate and preparatory education who have the ability to teach English in those educational seminars
- 2. Preparing graduates who use the English language with the command of the four skills: comprehension and comprehension, speaking,

Reading, writing

3. Enable students to review, consolidate, develop and deepen the language skills they have acquired in the stages

**Previous Tuition** 

4. Enable students to rely on themselves in understanding what they read in English

beyond the boundaries

Previous study

- 5. Qualifying students highly qualified to continue postgraduate programs
- 6. Creating a balanced student personality behaviorally and emotionally
- 7. Using technologies to achieve integration between other methodological aspects and introducing them as an essential part of education programs
  In the section
- 8 . Seeking to acquire specialization in addition to educational and methodological culture
- 10. Required Program Outcomes and Teaching, Learning and Assessment Methods
  - A-A cognitive objectives.
    - A1- Memorizing or remembering information and perceiving it
    - A2- Comprehension and comprehension, i.e. 1- Developing mental abilities and skills2- Translation3- Interpretation4- Inductive estimation
    - A3- Application: The use of abstract ideas in new and concrete situations0
    - A4- Analysis: Any analysis of the material into its constituent elements and tracking the relationships between the parts and the way they are organized.
    - A-5- Installation: Placing the elements and parts so that they are one whole 0 A6-Calendar
  - B Skills objectives of the program:
    - B1- Providing students with grammatical abilities that enable them to evaluate the topic.
    - B2- Developing the linguistic wealth of students and providing them with many words and structures.
    - B3- Activating the topic with students and collecting, coordinating and writing ideas.
    - B4- Accustom students to the accuracy of observation and distinguish between right and wrong.

## Teaching and learning methods

- 1- The traditional lecture method
- 2- E-learning method using PowerPoint and teaching methods.
- 3- Method of questioning and discussion
- 4- Brainstorming method

#### Evaluation methods

- 1- Daily and monthly oral and written exams
- 2- The method of application by the student himself

- 3- Open Book Exam
- 4- Research and Reports
- C- Emotional and value goals:
- A1- Reception: The student's desire to receive the lesson and pay attention to it.
- C2- Response: Beyond mere attention to the phenomenon in an active and effective manner.
- C3- Valuation (evaluation) Evaluation of the learner and his appreciation of any phenomenon and behavior and the lesson itself and its role in daily life.
- C4- Organization: The teacher represents the lesson sequentially, determines the mutual relationships between them, and establishes dominant values.

#### Teaching and learning methods

- -Traditional lecture
- Electronic lecture using PowerPoint
- -Practicality
- The method of explanation and discussion is individual and groups
- The student joins, for example, a seminar on how to teach grammar in the English language in a proper way.
- A group workshop between the teacher and students in which they explain certain patterns using visual writing means.

#### **Evaluation** methods

Evaluation is carried out through oral and written examinations and evaluation of research carried out by groups.

- 10. General and qualifying skills transferred (other skills related to employability and personal development).
- D1- Perception: Understanding the meaning and formulating a concept.
- D2- Application: Use of information in a new situation.
- D3- Dividing the information into parts to fully understand it .
- D4- Synthesis: Gathering ideas and forming something new.
  - d. General and qualifying skills transferred (other skills related to employability and personal development).
    - D1--Developing the student's mental abilities
    - D2- Developing skill capabilities.
    - D3- Dealing with students' levels.

Teaching and learning methods

- Explanation, direct delivery and presentation by means of illustration
- Discussion during the lecture
- Use interrogation methods and implicit questions.

#### **Evaluation methods**

- -Daily testing and reports
- -Monthly tests
- Final exams

#### 11.Program Architecture

Credit	Hours	Course Name	Course or Course Code	Grades
practical	theoretical			
2		Writing		First

## 12. Planning for personal development

- 1- The curriculum is not enough to take care of students and achieve what they aspire to.
- 2- The curriculum should be adapted to students' present and future.
- **3-** The teacher should have an influential personality in order to leave an impact on the hearts of students
- 13. Admission criterion (setting regulations related to admission to a college or institute)
  - 1- Central Admission
  - 2- Student desire
  - 3- Competitive rate between departments

14. The most important sources of information about the program
Electronic references for approved books/ Central Library Textbooks

8. Course Objectives						
Introducing students to grammar and its basics is the basis for composing and constructing sentences.  And help students understand complex structure correctly 0						

9. Course Outcomes and Methods of Teaching, Learning and Assessment

- A- Knowledge Objectives
  - A1Speak a sound language.
  - A2. Distinguishing between vocabulary of similar use
  - A3 Knowledge of phonetic symbols
  - A4 Ability to understand literary and assimilative texts
- B Course skills objectives

B1 To have the ability to think and comprehend.

- B2. The student must have the ability to write.
- B3. Participate in discussions in the classroom.
- B4. The ability to pronounce and distinguish sounds and know the writing of their symbols

#### Teaching and learning methods

- 1- Theoretical and practical lectures.
- 2- Use of teaching aids (presentations and scientific films)
- 3- Practicality.

#### **Evaluation** methods

Semester theoretical and practical tests, discussion during the lecture and final exams

# C- Emotional and value goals

- A1The student should be motivated to solve the assignment
- C2. The student should discuss seriously in the lecture
- C3. Interaction as groups with the professor
- A4 .Conclusion

#### Teaching and learning methods

- 1- Brainstorming
- 2- Discussion
- 3- Manifold questions in language.

#### **Evaluation** methods

- Weekly assignments
- Semester exams
- Evaluating the student through classroom performance and participation in various events.
- d. General and rehabilitative skills transferred (other skills related to employability and personal development).
  - D1 .Listening to English speakers and trying to speak continuously for the development of the linguistic aspect
  - D2 Ability to employ the linguistic aspect of teaching in schools and other institutions
  - D3. Writing continuously
  - D4. Continuous reading

Preparing and qualifying students to meet the requirements of the market in the						

Preparing and qualifying students to meet the requirements of the market in the public and private sectors through diversification in teaching methods, education and training students to solve real problems in the work environment

Encouraging and developing scientific research in the fields of psychological and educational sciences in general

Preparing a stimulating environment for faculty members to develop their
knowledge and educational and research skills
Building and developing cooperation with other governmental, private and
community sectors

#### 24. Required Program Outcomes and Teaching, Learning and Assessment Methods

- A-A cognitive objectives.
  - A1 Clarifying the basic concepts of psychology and applying them in other scientific and social fields
  - A2- Acquire skills in addressing and overcoming problems
  - A3- Gain experience in different environments
  - A4- Gaining experience in the educational and learning system
  - A5- Designing an educational and learning bag that simulates classroom and extracurricular reality
  - A6- Evaluation of academic work and ways to develop it
- B Skills objectives of the program:
  - B1 The ability to think about addressing the many problems that tell the practical reality
  - B2 Writing scientific reports and analyzing their data and vocabulary
  - B3 Proficiency and the ability to design educational programs and bags for scientific and cognitive training

#### Teaching and learning methods

- Explanation and clarification
- Display the scientific material in the manner of data show, plasma screen and smart board
- Cooperative education and self-learning
- -Seminars
- Graduation Projects
- Field visits to the applicators

#### Evaluation methods

- Short exams (COB)
- Homework
- Semester Exams

- Final Exams
- C- Emotional and value goals: according to Krathul's classification of emotional goals
- C1- Acceptance/Arouse students' attention to educational aids such as plasma screens and data show
  - C2- Responding and following up the extent to which students interact with the display on the screen
  - C3- Evaluation, i.e. giving value to the thing presented to students
  - C4- Formation of the trend, meaning that the student is sympathetic to what is presented in front of him

#### Teaching and learning methods

- Active participation in the classroom
- Commitment to the lesson date and submission of homework
- Performance of semester and final exams and cognitive achievement

#### **Evaluation methods**

- Homework
- Interaction within the lecture
- Commitment to the time of attendance and departure
- d. General and qualifying skills transferred (other skills related to employability and personal development).
  - D1- Developing the student's ability to deal with artificial intelligence
  - D2- Developing the student's ability to deal with the Internet
  - D3- Developing the student's ability to deal with teaching aids
- D4- Developing the student's ability to deal with dialogue, discussion and providing lessons

Objectives of the Academic Program							
This course aims to teach first-year students in the Department of							
English Language / Arts in Iraqi universities. This curriculum or							
course is designed in response to the needs of							
course is designed in response to the needs of	j sinacius in a simpujuea						

book to provide them with basic information about English literature	
of various kinds, especially in the field of poetry, theater, prose and	
short story, as each of the aforementioned types of literature is	
taught in specific chapters separate from the rest of the genres. This	
book is not interested in teaching advanced students in the study, as	
the curriculum is designed to teach beginner students and Help them	
understand English literature and encourage them to develop their	
skills in this field.	
Be able to understand linguistic significance as well as search for	A-
literary sources.	
Be able to know how to invest competence and awareness of	In-
language skills.	
Enable the student to achieve the general educational goals.	C-
Familiarize the student in detail with the eras during which	D-
education passed.	
Identify the percentage of understanding of the material presented to	E -
him and identify the factors affecting him in pronunciation or	
spelling.	
Enable the student to know the pedagogy in Athens.	And-
Familiarize the student with knowledge of the objectives of	G-
education, old and new.	
To be familiar with the methods used to convey the ideas he acquires	Going
from some professors, because practice has an important role in the	to-
production of language skills.	

# 10 - Required program outcomes and methods of teaching, learning and evaluation.

# **A- Cognitive Objectives:**

- A-1 Enhancing the student's own abilities in tasting English poetry.
- A-2 Knowing the motives that the poet must adopt in his literary creativity
- . 3Adopting an important approach to understanding English literature and its outputs.

#### **B- Skills objectives of the program:**

B1 Introduce the student to English literature and understand the rhetorical means used by the poet in the poem's systems.

- B2 Expanding the student's cognitive abilities in analyzing and studying poetry.
- B3- Establishing the student's ability in the process of analysis and comprehension of the literary text .

#### Teaching and learning methods.

Through electronic lectures and clarification of everything contained in poetry through rhetorical means of illustration.

#### **Evaluation methods.**

Daily, quarterly and final evaluation, the daily attendance of students, the weekly reports submitted by the student, as well as conducting written and oral tests, and students' participation in enriching the lecture.

# C- Emotional and value goals:

- C1- The student should conclude the importance of the essay questions.
- C2- The student should analyze the types of objective questions.
- C3- The student should be aware of the relationship between education and the environment.
- C4- The student should express his opinion on the role of education in human life.

## Teaching and learning methods.

- Discussion and questioning.
- Interrogate students using traditional questions.

### **Evaluation methods.**

- 1- Daily oral exams.
- 2- Student engagement and interaction through discussions in directed questions and inquiries.
- 3. Written exams) Monthly and quarterly

# d. General and qualifying skills transferred (other skills related to employability and personal development).

- 1.- The skill of analysis and verification in the literary text.
- 2. Learn the skill of conversation.
- 3. The style of reading literary texts, especially poetry, theater and prose.
- 4. Developing the skill of writing literary texts.
- 5. Expanding the perceptions, feelings and feelings of students in tasting literary production .

# Teaching and learning methods.

- 1- Using intellectual questions to know the student's ability to analyze and conclude.
- 2- Making groups inside the classroom.
- 3. Ask questions as homework.

#### **Evaluation methods.**

- 1 Asking questions that lead to mental focus.
- 2- Monitor the behavior and answers of students.
- 3. Oral tests.
- 4. Written exams

## **37.Objectives of the Academic Program**

- Qualifying students to master the English language with all its language skills and cultural background.
- Enable students to master critical and literary analysis, translation, and applied and theoretical language teaching.
- Familiarity with a variety of teaching methods of modern teaching methods such as films, videos, language lab, audio and others, which

qualify them to teach English effectively and effectively.

- Refine students' critical and creative thinking skills and develop their research abilities in the field of specialization.
- Conducting theoretical, empiric, applied and comparative research in the fields of English language and literature, linguistics and various teaching methods.
- Encourage a critical understanding of the thought and cultures of the English-speaking world, and open channels of cultural dialogue with English-speaking nations and peoples.
- 38. Required Program Outcomes and Teaching, Learning and Assessment Methods

#### **B- Cognitive Objectives**

- A1- Know and understand the linguistic and grammatical rules and pronunciation of words in the English language.
- A2- Knowing and understanding the common linguistic and literary expression methods in the English language and analyzing its texts.
- A3- Knowledge of the most famous writers, thinkers and linguists, ancient and contemporary, in the heritage of the English language and understanding Their most important literary and intellectual output.
- A4- Knowledge and understanding of the most important modern teaching methods and methods in addition to the most important means of evaluation and evaluation

Language tests used in the assessment and teaching of English.

## B - Skill objectives of the program

- B1- Students are trained on basic language skills such as writing sentences accurately.
- B2- Training students to develop their speaking and listening skills to be able to deal with

Special communication situations

B3 - Provide reading skills and strategies for students to practice them as reading mechanics, and reading techniques

And vocabulary skills.

B4 - Developing students' abilities on writing skills such as inference from facts and facts presented in pieces

Selected reading, emphasizing the development of their abilities to distinguish between perspectives and established facts.

### **Teaching and learning methods**

- Provide students with the basics and topics related to the knowledge and systems described in A.
- Clarification and explanation of study materials by the teaching staff using different classroom techniques to attract attention

Students.

- Refine students' self-knowledge by emphasizing the performance of homework for academic vocabulary.
- Encourage students to learn and self-explore knowledge by visiting libraries and websites

To obtain additional knowledge of the subjects.

- Improving students' critical and creative thinking skills by enrolling them in additional courses for the subjects

Tuition.

#### **Evaluation methods**

- Daily tests with multiple-choice questions for subjects.
- Participation grades for students' challenging competition questions.
- Setting grades for the assigned homework.

### C- Emotional and value goals.

- A1- The student should describe the importance of learning English.
- A2- The student should participate in the activities of the department.
- A3- The student should encourage his colleagues to commit to periodic discussions in the lecture.
- C4- The student should appreciate the contributions of scientists and theorists in the development of language.

## **Teaching and learning methods**

- Field visits to some model schools or showing films and tapes (videos) to convey a realistic image and learn about the culture of countries that speak English , which is more effective in your conversation with students? Or watching the tape (video).

- A data bank in which news, stories and some achievements found in the environment, newspapers, magazines and books are collected by involving students in that field as an activity for them, provided that the task of the university professor is supervisory and then that information is used to support emotional goals.
- Presenting lessons always in different ways and in a variety of ways, using suspense, including the story style, which is the most important way to support emotional goals, especially in literary materials.
- Encourage students to form discussion groups during lectures to discuss topics that require thinking, analysis, exchange and acceptance of the opinions of the other party.

#### **Evaluation methods**

- Identify interest, knowledge and skills.
- Observation
- Specific grades for homework by writing self-reports on the topic of the lecture.

# d. General and qualifying skills transferred (other skills related to employability and personal development).

- D1- The ability to work together, manage the team and communicate positively with others.
- D2. The ability to express in a brief word and collect and present information in an appropriate manner.
- D3- The ability to propose appropriate solutions to any problem that may face him in his field of work.
- D4- The ability to use information technology and employ it in his field of specialization.

## **Teaching and learning methods**

- Develop teaching curricula in coordination with the departments with which he will deal.
- Develop teaching curricula by the department similar to the work environment.
- Sending students for training in training institutions and institutes.
- Training students with experiences that simulate reality.
- Inviting some professional bodies and organizing meetings with students.
- Training students to solve problems, and create a fertile environment for creativity.
- Encourage critical thinking and judgment.
- Increase students' respect and understanding of others' abilities, interests and needs.

#### **Evaluation methods**

- Apply continuous evaluation procedures based on the results of the evaluation.
- Provide fair, correct, bona fide and impartial criteria against which to assess.
- Provide criteria for evaluating the selection process by linking the results of the selection process with merit-based performance evaluation.

## 40. Planning for personal development

- Employing new teaching methods.
- Employing new means that serve the curriculum.
- Employing innovative reinforcement methods to enhance students.
- Participate in the evaluation and development of the curriculum and its analysis into its various elements.
- Familiarity with the skills and techniques of rapid access to knowledge and information such as computer, and the Internet and others.

# 41.Admission criterion (setting regulations related to admission to a college or institute)

To register a student for the first university degree (bachelor's degree in English):

- To meet the admission requirements determined by the Ministry of Higher Education and Scientific Research.
  - To have a certificate of completion of preparatory school or its equivalent from other countries.
  - To be willing to study in the department of his/her choice.
  - To pass the aptitude test and personal tests and tests of readiness to work in the teaching profession pass the medical examination).

## 42. The most important sources of information about the program

- Teaching staff.
- Course.
- Availability of hardware, equipment, materials and software appropriate to the specialty.
- Relevance of learning resources to specialization.
- Good use of learning resources in the educational process.
- Availability of books and periodicals, their diversity, modernity and coverage of all areas of knowledge in the specialization.
- It provides an integrated library in terms of information containers, equipment and specialized technical cadres to serve the specialization.
- Subscribe to electronic databases in the field of specialization.
- The existence of an electronic system for managing educational content and the availability of electronic materials .
- It provides an electronic system to search for information in the library in addition to electronic libraries.

# **Course Description Form**

## **Course Description**

The course (English grammar) aims to introduce students to the basics of grammar from the common rules, exceptions and different linguistic styles and their impact on the use of the grammatical rule. The course also addresses the relationship between grammar and semantics in terms of the effect of the application of the rule in the linguistic meaning, in addition to the effect of meaning in the use of the grammatical rule. The course also provides a large space of different exercises for the purpose of familiarizing yourself with the linguistic base and applying it properly.

College of Education for Human Sciences / Al-Muthanna University	25. Educational institution

/EG 106 Grammar – Phase I	27. Course Name/Code
Attending lectures	28. Available Attendance Forms
School Year 2023-2024	29. Semester / Year
(90) study hours	30. Number of Credit Hours (Total)
20-3-2024	31. The history of preparation of this description

## 32. Course Objectives :

Enable students to use grammatical rules properly and in a way that leads to the use of the English sentence and thus the English text properly.

9. Course Outcomes and Methods of Teaching, Learning and Assessment:

## **A- Cognitive objectives**

- A1- Identify the concept of grammar and its importance in the use of language.
- A2- Identify the English rule and use it properly.
- A3- Addressing linguistic methods of expression and their impact on the use of the grammatical rule.
- A4- Intensive training in the use of the rule and in all linguistic forms.

## **B** - Skills objectives of the course.

- B1 The student should recognize the concept of grammar and its importance in the language.
- B2 To recognize the specificity of English grammar.
- B3 To recognize the most important English grammar.
- B4- Using grammar properly in linguistic expression.

## Teaching and learning methods:

- 1. Giving lectures.
- 2. Student groups.
- 3. Integration of theory and practice.
- 4. Assigning students to expand on topics and apply them to different sentences.

#### **Evaluation Methods:**

- 1.. Theory tests
- 2. Practical tests.
- 3. Daily duties.
- 4. Reporting.

## **C- Emotional and value goals:**

- C1- The student's ability to think and discern.
- C2- Developing critical thinking.
- C3- Deciding on the proper use of the grammatical rule.
- C4- Developing the spirit of teamwork.

## **Teaching and learning methods:**

- 1. Explanation and clarification.
- 2. Propose solutions to grammatical problems at the level of the sentence and the comparison between them.
- 3. Self-learning.
- 4. The use of modern electronic means.

### **Evaluation Methods:**

- 1. Theoretical tests.
- 2. Practical tests.
- 3. Daily duties.

# d. General and rehabilitative skills transferred (other skills related to employability and personal development).

- D1- Developing the student's ability to dialogue and discussion.
- D2- Developing the student's ability to choose and make decisions.
- D3- Developing the student's ability to benefit from academic sites.
- D4- Developing the student's ability to deal with various electronic means.

# 12. Course Development Plan

Exposure to new sentences and texts for the purpose of covering the achievement of as much practice and training as possible.

#### **Course Description**

This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, proving whether he or she has made the most of the available learning opportunities. It must be linked to the program description.

AI , Muthanna University	Educational institution			
English Language / College of Education for Human Sciences	2. University Department / Center			
Computers / First Stage	3. Course Name/Code			
theoretical	4. Available Attendance Forms			
annual	5. Semester / Year			
2 weekly	6. Number of Credit Hours (Total)			
10/01/2024	7. The history of preparation of this description			

#### 8. Course Objectives

- 1- Building a solid scientific base for the student
- 2- Knowledge of the basics of computer applications and their uses
- 3- Improving the student's practical and theoretical performance
- 4- Improve knowledge of computer hardware and software
- 5- The ability to create practical skills and creativity
- 9. Course Outcomes, Teaching and Learning Methods, and Assessment Methods

A cognitive goals

- A-1 The student's comprehension of the material
- A-2 Ability to analyze and apply what you have learned in practice to the calculator
- A-3 The evaluation is carried out through the presentation of the material among the students in the laboratory and then applied by them
- B The skills objectives of the course.
- B1 Direct questions and answers about the previous article
- B2 Analysis of the student's ability to absorb through the work home implemented at home and stored on disks to display them directly in front of the student to see the extent of what they learned from the previous lecture
- B3 Display educational films for the subject in order to consolidate the ability to learn .

#### Teaching and learning methods

Theory and explanation by presenting the material on the Point Power program in the form of charts and pictures in order to attract the student's attention and help him not to feel bored. And the practical way is to apply what has been presented on the calculator and conduct daily and monthly exams.

#### **Evaluation methods**

#### Written exams

The score of the first semester exam out of (15) degrees

The score of the second semester exam out of (15) degrees

Daily attendance and participation score (5)

Final exam score out of 60 points

- C. Emotional and value goals
- C-1 Guiding the student on how to use the computer in accordance with his cultural level
- C-2 Guiding the student how to deal with social sites

#### Teaching and learning methods

Presentation of the material in the form of educational films

The student is asked to conduct research and reports on the importance of using the computer in our lives and the use of means of communication between them and make simple films about that as well and discuss reports

#### **Evaluation methods**

Two marks are calculated and are included in the degree of attendance and participation

- d. General and Transferable Skills (Other Skills Related to Employability and Personal Development)
- D-1 Urging the student to write simple research papers towards previous lectures to create a state of balance between methodological information and source information
- D-2 Urging the student to make practical projects on the computer and holding seminars among students on the methodology of the subject
- D-3 Urge the student to evaluate the answer of his fellow students from other students to develop self-development .

#### 10 Years. Course Structure

The week	Hours	Required Learning Outcomes	Name of Unit/Subject	Method of education	Evaluation method
1	2	Introducing the student to the stages of computer development	Computer Fundamentals	theoretical	Discussion, tests
2	2	Familiarize the student with the areas of computer use	Computer Fundamentals	theoretical	Discussion, tests

## 10. Course Outcomes and Methods of Teaching, Learning and Assessment

## A- Cognitive goals

- 1. Memorizing or remembering information and perceiving it
- 2. Understanding and comprehension i.e. 1.-Develop mental abilities and skills 2. Translation 3. Taweel 4. Inductive estimation
- 3. Application: The use of abstract ideas in new and concrete situations.
- 4. Analysis: Any analysis of the material into its constituent elements and tracking the relationships between the parts and the way they are organized.
- 5. Composition: Placing the elements and parts so that they form one whole.
- 6. Calendar
- **B-** Course skills objectives.
  - 1. Talk fluently.
  - 2. Talk and listen carefully.
  - 3. Read and write correctly
  - 4. Distinguish between listening, reading and writing as part of a whole.

**Teaching and learning methods** 

## E-learning method using PowerPoint.

The way to listen to CDs contains programs for audio in the mp3 player.

Method of questioning and discussion

**Brainstorming method** 

#### **Evaluation methods**

- Daily and monthly oral and written exams
- -How to apply by the student himself
- -Open Book Exam
- -Research & Reports

## C. Emotional and value goals

- 1. Reception: The student's desire to receive the lesson and pay attention to it.
- 2. Response: Go beyond mere attention to the phenomenon in an active and effective manner.
- 3. Valuation (evaluation) Evaluation of the learner and his valuation of any phenomenon and behavior and the lesson itself and its role in daily life.
- 4. Organization: The teacher's representation of the lesson in a follow-up manner, determining the mutual relationships between them and establishing dominant values.

## Teaching and learning methods

- Electronic lecture using PowerPoint
- -Practical application using a computer
- The method of explanation and discussion is individual and groups
- The student should join, for example, a seminar on how to recall vocabulary in the English language in a proper way.
- A group workshop between the teacher and students explaining the ideas contained in the reading texts.

#### **Evaluation methods**

Evaluation is carried out through oral and written examinations and evaluation of research carried out by groups.

- 1. General and qualifying skills transferred (other skills related to employability and personal development).
- 2. Cognition: understanding meaning and formulating a concept
- 3. Application: Use of information in a new situation
- 4. Break down information into parts to fully understand it
- 5. Composition: Putting ideas together to formulate something new.

## 13. Course Development Plan

The learner of English as a foreign language should be able to explain each topic before it is explained by the teacher using the Internet through educational videos and songs that focus on sounds before reading the methodological book as a theoretical material, thus developing the curriculum practically and theoretically.

Glowsuf T. Filal Filamaya

Enable the student how to research the history of ea	ducation.	Going to-						

# 11 - Required program outcomes and methods of teaching, learning and evaluation.

## **C- Cognitive Objectives:**

- A1- The student should know the concept of education.
- A2- The student should explain the importance of education.
- A3- The student should set a set of educational goals.
- A4- The student should analyze the types of education.
- A5- The student should conclude the importance of education recently.
- A6- The student should express his opinion on the importance of education.

## **B- Skills objectives of the program:**

- B1 The student draws a diagram showing the most important types of education.
- B 2 The student should prepare a photographer on the blackboard, explaining the eras that education has gone through.
- B3 The student should use the data shop device to display forms of education.

## Teaching and learning methods.

• Delivery, lecture, discussion and interrogation style.

### **Evaluation methods.**

Achievement tests are as follows: - 40 % quarterly tests.
 60 % quarterly exams.

## **C- Emotional and value goals:**

- C1- The student should conclude the importance of the essay questions.
- C2- The student should analyze the types of objective questions.
- C3- The student should be aware of the relationship between education and the environment.
- C4- The student should express his opinion on the role of education in human life.

## Teaching and learning methods.

- Discussion and questioning.
- Interrogate students using traditional questions.

### **Evaluation** methods.

• Achievement tests at the emotional level of the Krathol classification.

# d. General and qualifying skills transferred (other skills related to employability and personal development).

- D1- The skill of classroom management and control.
- D2- The skill of asking questions.
- D3- Evaluation skill.
- D4- The skill of linking the material to reality using reinforcement examples from daily life.

## Teaching and learning methods.

• Different teaching styles (cooperative learning style, sports style, role playing style)

### **Evaluation methods.**

Achievement tests of various types and levels.

## 14- Program structure.

Credit Hou	ırs	Course Name	Course or Course Code	Grades
Credit Hou practical	theoretical			
	6	Foundations of Education	/	The first

## 15- Planning for personal development.

Developing the vocabulary of the curriculum by (20%) of modern topics in line with the developments of the times for the purpose of preparing the student professionally, educationally and psychologically correctly.

# 16- Admission criterion (setting regulations related to admission to a college or institute)

student's rate in the preparatory school stage in addition The to the desire. well geographical of the student's student's as the area as residence in line with the admission policy in Iraqi universities, colleges institutes affiliated to the Ministry of Higher Education and Scientific Research.

## 17- The most important sources of information about the program.

books, References and sources from research, studies, periodicals and means of communication from the Internet others various and the of the foundations of education, measurement and evaluation subject in education and educational psychology.

the Developing according to the nature of the curriculum course and the year of authorship, and the development is through the of deletion, addition replacement chapters of parts or or the scheduled curriculum if there actual reasons for development are determined in advance.

#### **Course Description**

This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, proving whether he or she has made the most of the available learning opportunities. It must be linked to the program description.

AI, Muthanna University	1. Educational institution
English Language / College of Education for Human Sciences	2. University Department / Center
Arabic Language / First Stage	3. Course Name/Code
theoretical	4. Available Attendance Forms
annual	5. Semester / Year
2 weekly	6. Number of Credit Hours (Total)
10/01/2024	7. The history of preparation of this description

#### 8. Course Objectives

- 1- Building a solid scientific base for the student
- 2- Knowledge of the basics of general Arabic
- 3- Improving the student's practical and theoretical performance
- 4- Improving students' knowledge of Arabic language skills
- 5- The ability to write properly and pronounce correctly
- 9. Course Outcomes, Teaching and Learning Methods, and Assessment Methods

A cognitive goals

- A-1 The student's comprehension of the material
- A-2 Ability to pronounce correctly and write correctly
- A-3 The evaluation should be carried out by presenting the material to the students
- B The skills objectives of the course.
- B1 Direct questions and answers about the previous article
- B2 Analyze the student's ability to comprehend by asking questions related to how students are able to learn the skill of

writing and pronunciation

B3 - Presenting applied models and examples to students to apply what they have studied

#### Teaching and learning methods

Theory and explanation by presenting the material on the board in order to attract the student's attention and help him not to feel bored. And the practical way is to apply what has been explained and conduct daily and monthly exams.

#### **Evaluation methods**

#### Written exams

The score of the first semester exam out of (18) degrees

The score of the second semester exam out of (18) degrees

Degree of daily attendance and participation (2) degrees

Final exam score out of 60 points

- C. Emotional and value goals
- C-1Guiding the student on how to learn general Arabic in accordance with his cultural level
- C-2 Guiding the student how to deal with social sites

#### Teaching and learning methods

Presentation of the material in the form of educational films

The student is asked to conduct research and reports on the importance of using the computer in our lives and the use of means of communication between them and make simple films about that as well and discuss reports

#### Evaluation methods

Two marks are calculated and are included in the degree of attendance and participation

- d. General and Transferable Skills (Other Skills Related to Employability and Personal Development)
- D-1 Encourage the student to write simple research papers towards previous lectures to create a state of balance between methodological information and source information
- D-2 Urging the student to develop the writing skill and holding seminars among students on the methodology of the subject
- D-3 Urging the student to evaluate the answer of his fellow students from other students to develop self-development .

various dialogues	
4 / Enable knowledge of sociolinguistic norms that	affect the use of speech
strategies	

# 11. Course Outcomes and Methods of Teaching, Learning and Assessment

#### **12.**

- A- Cognitive objectives
  - A1- Knowledge and understanding of prevailing English cultural concepts.
  - A2- Know and understand the methods of communication in different facilities.
  - A3- Know and understand the English expressions used in daily life.
  - A4- Identify and review different laws related to listening, speaking, grammar and voice.
  - A5- Identify social topics and how to discuss them socially.
- B Skills objectives of the course.
  - $\ensuremath{\mathsf{B1}}$  Training students to listen to real conversations of native English speakers .
  - B2 Training students to speak and communicate through speech and electronic communication.
  - B3 Adopting the method of giving lectures and involving students in

discussing linguistic topics.

B4- Asking intellectual questions for the purpose of measuring the extent of students' comprehension and understanding of the material.

## Teaching and learning methods

- 1 / Presentation of samples of the real dialogues to students
- 2 / Involve students in classroom and extracurricular activities that include the real communicative use of language

#### **Evaluation** methods

- 1 / Observing the performance of students in daily activities
- 2/ Use of daily oral short tests
- 3 / Conduct monthly oral and written exams
  - C. Emotional and value goals
    - C1- Encouraging students to learn English
    - C2- Developing positive attitudes and tendencies among students
    - C3- Raising the level of students' awareness of local and foreign cultures and the differences between them

A4-

# Teaching and learning methods

- 1/ View lessons and dialogues using Data Show
- 2/ Use Power Point
- 3/ Use video presentations

#### **Evaluation** methods

- 1/Observation
- 2 / Evaluation of students' performance in homework Daily and monthly tests

- d. General and rehabilitative skills transferred (other skills related to employability and personal development).
  - D1- Ability to use critical thinking
  - D2- Ability to explore and find solutions
  - D3. Ability to work in groups
  - D4-

	description
51. Objectives of the Academic Program	

- 1 Introducing the student and informing him of a set of crimes committed by the defunct and dissolved Baath Party against the Iraqi people and from various components and sects.
- 2 Increase students' awareness to reject all forms of injustice and authoritarianism of these dictatorial regimes and demand all civil and political rights.
- 3 The ability to analyze and criticize the political reality
- 52. Required Program Outcomes and Teaching, Learning and Assessment Methods: Giving lectures and using the method of discussion and dialogue.

#### A-A cognitive objectives.

- A1- Introducing the student to the crimes committed by the former Baath regime against the Iraqi people.
- A2- Making the student aware of any media blinding that tries to mislead them.
- A3- Introducing the student to the psychological and social crimes committed by the former Baath regime and their effects on the Iraqi individual.
- A4- Introducing the student to the environmental crimes suffered by the Iraqi people during the period of the rule of the former Baath regime.
- B Skills objectives of the program:
  - B 1 Developing the student's ability to understand the historical events experienced by Iraq.
  - B 2 Developing the student's question and dialogue skills.
  - B3 Developing the student's ability to participate effectively in the classroom.
  - B4- Developing the student's ability to analyze and conclude

Teaching and learning methods

- 1- Traditional methods by simplifying the scientific material / lecture method.
- 2- Engage students in thinking by asking questions.

#### Evaluation methods

- 1- Written tests.
- 2- Oral tests.

- C- Emotional and value goals:
  - C1- The student should discuss seriously in the lecture.
  - C2- The student should be enthusiastic about performing the duty.
  - C3- Interaction as groups with the professor.

Teaching and learning methods

Group learning and the use of communicative method, discussion, question and answer and other audiovisual means.

#### **Evaluation methods**

- 1- Daily Testing
- 2- Monthly Test
- 3- Final Exams
- d. General and qualifying skills transferred (other skills related to employability and personal development).
  - D1- Access to reliable external sources
  - D2- Preparing researchers capable of scientific research
  - D3- Continuous reading

Teaching and learning methods

Using the communicative method, discussion, question and answer - group learning

**Evaluation methods** 

Daily, monthly and final exams

53. Program Architecture

	description
65.Objectives of the Academic Program	

- The course aims to develop the student's skills in reading, listening, comprehension and writing, in addition to enriching the student with English vocabulary that helps him communicate in communication and share experiences and knowledge with others.
- The course also helps the student to learn about Western cultures and literary works that convey the experiences and experiences of the peoples of the world through the ages and that document the political, social and literary history of these peoples.
- One of the objectives of the course is also to introduce the student to the structure of theatrical work and the multiple literary movements that emerged successively through the ages and were the basic building block in the development of theatrical work.

# 66. Required Program Outcomes and Teaching, Learning and Assessment Methods

# A- Knowledge Objectives

- A1- Identify the terminology of the theatrical work.
- A2- Identify the history of the eras in which the theatrical works to be studied were written.
- A3- Helping the student to classify the course according to multiple literary movements.
- A4- Helping the student to raise the level of constructive critical thinking and deduce the main goal of the course and link it to the reality of his society.
- A5- Developing the student's ability to comment in dialogue or writing about the most important topics that have been raised and addressed in the course.

## **B** - Course skills objectives

- **B1-** Reading, writing, comprehension and communication.
- B2- Acquire the ability to interact in society.
- B3- Raising the student's ability to express his ideas through dialogue or writing.
- B4- Raising the level of awareness of the student and his coexistence with society.

# **Teaching and learning methods**

- 1- Discussion and dialogue in raising the topic as a communicative method.
- 2- Using modern illustrative means such as YouTube to display plays, PowerPoint, Google Meet, audio recording of the lecture and .pdf files
- 3- Preparing weekly or quarterly reports that clarify the most important matters related to

the course.

#### **Evaluation methods**

- 1- Daily tests Quizes.
- 2- Quarterly exams.
- 3- Discussion panels during the lecture.
- 4- Writing research and reports that deal with the course vocabulary in detail.

#### C- Emotional and value goals

- C1- The student's response to the main objective of the course, which is to develop his four skills.
- C2- The student should trust that literary work is an effective means of transferring the experiences of others and benefiting from them socially.
- C3- Enhancing the student's self-confidence by distinguishing the different topics that were addressed in the course and choosing what suits his personality and society.
- C4- Developing his ability to listen and learn from others.

#### **Teaching and learning methods**

- The student reads the theatrical text during the lecture.
- 2- Brainstorming and asking questions about the vocabulary of the course.
- 3- Linking the course vocabulary with the reality of the student's society as an effective illustrative means.
- 4- Repeated emphasis on literary terms for theatrical work to help the student analyze the structure of the theatrical work in a constructive and critical manner.

# d. General and rehabilitative skills transferred (other skills related to employability and personal development).

- D1- Cognition: Understanding meaning and formulating new concepts.
- D2-Application: Use of information extracted from the course in new situations.
- D3- Analysis: The ability to analyze the theatrical text and draw moral lessons from it.
- D4- Installation: Collecting scattered ideas to form new concepts that keep pace with reality.

# 77. Objectives of the Academic Program

- 1- Graduating qualified professors in the field of specialization (teaching) equipped with good teaching skills.
- 2 Development of teaching and educational staff in the field of specialization teaching English.
- 3- Developing the academic and educational capabilities of human resources in a way that contributes to the development of students' language abilities in -C

### Secondary stages.

- 4- Developing research aspects in the field of linguistic and educational studies.
- 5- Introducing students to grammar and its basics is the basis for composing and constructing sentences.
- 6- Help students understand complex structures correctly 0
- 7- Overcoming the obstacles facing students in how to create organized sentences according to specific foundations and plans.
- 8- Creating the ability to properly and clearly form the learner
- 78. Required Program Outcomes and Teaching, Learning and Assessment Methods
  - A-A cognitive objectives.
    - A1- Memorizing or remembering information and perceiving it
    - A2- Comprehension and comprehension, i.e. 1- Developing mental abilities and skills2- Translation3- Interpretation4- Inductive estimation
    - A3- Application: The use of abstract ideas in new and concrete situations0
    - A4- Analysis: Any analysis of the material into its constituent elements and tracking the relationships between the parts and the way they are organized.
    - A-5- Installation: Placing the elements and parts so that they are one whole 0 A6-Calendar
  - B Skills objectives of the program:
    - B1- Providing students with grammatical abilities that enable them to evaluate the topic.
    - B2- Developing the linguistic wealth of students and providing them with many words and structures.
    - B3- Activating the topic with students and collecting, coordinating and writing ideas.
    - B4- Accustom students to the accuracy of observation and distinguish between right and wrong.

# Teaching and learning methods

- 1- The traditional lecture method
- 2- E-learning method using PowerPoint and teaching methods.
- 3- Method of questioning and discussion
- 4- Brainstorming method

#### **Evaluation methods**

1- Daily and monthly oral and written exams

- 2- The method of application by the student himself
- 3- Open Book Exam
- 4- Research and Reports
- C- Emotional and value goals:
- A1- Reception: The student's desire to receive the lesson and pay attention to it.
- C2- Response: Beyond mere attention to the phenomenon in an active and effective manner.
- C3- Valuation (evaluation) Evaluation of the learner and his appreciation of any phenomenon and behavior and the lesson itself and its role in daily life.
- C4- Organization: The teacher represents the lesson sequentially, determines the mutual relationships between them, and establishes dominant values.

## Teaching and learning methods

- -Traditional lecture
- Electronic lecture using PowerPoint
- -Practicality
- The method of explanation and discussion is individual and groups
- The student joins, for example, a seminar on how to teach grammar in the English language in a proper way.
- A group workshop between the teacher and students in which they explain certain patterns using visual writing means.

### Evaluation methods

Evaluation is carried out through oral and written examinations and evaluation of research carried out by groups.

- 10. General and qualifying skills transferred (other skills related to employability and personal development).
- D1- Perception: Understanding the meaning and formulating a concept.
- D2- Application: Use of information in a new situation.
- D3- Dividing the information into parts to fully understand it .
- D4- Synthesis: Gathering ideas and forming something new.
- d. General and qualifying skills transferred (other skills related to employability and personal development).
  - D1--Developing the student's mental abilities
  - D2- Developing skill capabilities.
  - D3- Dealing with students' levels.

## Teaching and learning methods

- Explanation, direct delivery and presentation by means of illustration
- Discussion during the lecture
- Use interrogation methods and implicit questions.

### **Evaluation methods**

- -Daily testing and reports
- -Monthly tests
- Final exams

# 79. Program Architecture

Credit	Hours	Course Name	Course or Course Code	Grades
practical	theoretical			
2	1	As		The second

## 80. Planning for personal development

- 4- The curriculum is not enough to take care of students and achieve what they aspire to.
- 5- The curriculum should be adapted to students' present and future.
- 6- The teacher should have an influential personality in order to leave an impact on the hearts of students
- 81. Admission criterion (setting regulations related to admission to a college or institute)
  - **4- Central Admission**
  - 5- Student desire

Chapter One + Chapter Two	65. Semester / Year
9 weekly	66. Number of Credit Hours (Total)
2024/3/19	67. The history of preparation of this description

68. Course Objectives

Introducing students to grammar and its basics is the basis for composing and constructing sentences.

And help students understand complex structure correctly 0

69. Course Outcomes and Methods of Teaching, Learning and Assessment

- A- Knowledge Objectives
  - A1-1 Identification of grammatical foundations
  - 2- Familiarize yourself with scientific terms.
  - 3- Identify the structures of grammatical sentences.
- B Course skills objectives
- B1 Acquire initial knowledge in the English language and the terminology used.
  - B2- Qualifying the student to learn about scientific subjects in the coming stages.
  - B3- Developing learning skills in English

## Teaching and learning methods

- 1- Theoretical and practical lectures.
- 2- Use of teaching aids (presentations and scientific films)
- 3- Practicality.

#### **Evaluation** methods

Semester theoretical and practical tests, discussion during the lecture and final exams

- C- Emotional and value goals
  - A1- Reception: The student's desire to receive the lesson and pay attention to it.
  - C2- Response: Beyond mere attention to the phenomenon in an active and effective manner.
  - C3- Valuation (evaluation) Evaluation of the learner and his appreciation of any phenomenon and behavior and the lesson itself and its role in daily life.
  - C4- Organization: The teacher represents the lesson sequentially, determines the mutual relationships between them, and establishes dominant values.

# Teaching and learning methods

- 1- Brainstorming
- 2- Discussion
- 3- Manifold questions in language.

### **Evaluation** methods

- Weekly assignments
- Semester exams
- Evaluating the student through classroom performance and participation in various events.
- d. General and rehabilitative skills transferred (other skills related to employability and personal development).
  - D1- Reviews of previous steps and their outputs
  - D2- Access to scientific developments through books and periodicals
  - D3- Access to the information network in the field of English language
  - D4- Conducting discussions and seminars with those with specific competence to raise the development of knowledge

Objectives of the Academic Program	-	9		
The student's knowledge of developmental psychology.				
The student is familiar with the importance of developmental psychology.				
Enable the student to achieve the general educational goals.				
Inform the student in detail of the factors that affected the individual during the age stages .				
Enable the student to know the age stages (embryonic, childhood, adolescence, adulthood, old age).				
Enable the student to know the goals of developmental psychology.				
The student's knowledge of the aspects of growth of	of the individual .	G-		
Empowering the student how to research developm	nental psychology .	Going to-		

# 12 - Required program outcomes and methods of teaching, learning and evaluation.

# **D- Cognitive Objectives:**

- A1- The student should know the concept of developmental psychology.
- A2- The student should explain the importance of developmental psychology.
- A3- The student should set a set of developmental psychology goals.
- A4- The student should analyze the age stages that the individual is going through.
- A5- The student should conclude the importance of developmental psychology recently.
- A6- The student should express his opinion on the importance of developmental psychology

## **B- Skills objectives of the program:**

- B1 The student should draw a diagram showing the age stages that the individual is going through.
- B2 The student should prepare a photographer on the blackboard, explaining the aspects of the individual's growth.
- B3 The student should use the data shop device to display the factors affecting the individual.

## Teaching and learning methods.

Delivery, lecture, discussion and interrogation style.

### **Evaluation methods.**

Achievement tests are as follows: 40 % quarterly tests.

60 % quarterly exams.

## **C- Emotional and value goals:**

- C1- The student should conclude the importance of the essay questions.
- C2- The student should analyze the types of objective questions.
- C3- The student should be aware of the relationship between developmental psychology and the environment.
- C4- The student should express his opinion on the role of developmental psychology in human life.

## Teaching and learning methods.

- Discussion and questioning.
- Interrogate students using traditional questions.

## **Evaluation methods.**

• Achievement tests at the emotional level of the Krathol classification.

# d. General and qualifying skills transferred (other skills related to employability and personal development).

- D1- The skill of classroom management and control.
- D2- The skill of asking questions.
- D3- Evaluation skill.
- D4- The skill of linking the material to reality using reinforcement examples from daily life.

# Teaching and learning methods.

• Different teaching styles (cooperative learning style, sports style, role playing style)

## **Evaluation methods.**

Achievement tests of various types and levels.

## 18- Program structure.

Credit Hou	ırs	Course Name	Course or Course Code	Grades		
practical	theoretical					
	6	Developmental Psychology	/	The second		

## 19- Planning for personal development.

Developing the vocabulary of the curriculum by (20%) of modern topics in line with the developments of the times for the purpose of preparing the student professionally, educationally and psychologically correctly.

# **20-** Admission criterion (setting regulations related to admission to a college or institute)

student's rate in the preparatory school stage in addition The to the desire. well geographical of the student's student's as the area as residence in line with the admission policy in Iraqi universities, colleges institutes affiliated to the Ministry of Higher Education and Scientific Research.

# 21- The most important sources of information about the program.

books, References and sources from research, studies, periodicals and various means of communication from the Internet others and the of the foundations of education, measurement and evaluation subject in education and educational psychology.

Developmental psychology , principles of general psychology , developmental psychology from fetus to old age.	
Scientific journals, periodicals, research and studies in the field of specialization.	A- Recommended books and references (scientific journals, reports,)
Various communication sites (Google and YouTube) etc	B- Electronic references, websites

# 16- Course development plan.

Developing the according to the nature of the curriculum course and the year of authorship, and the development is through the deletion, addition replacement chapters of of parts or the or scheduled curriculum if there for development actual reasons are determined in advance.

# **Academic Program Description**

This academic program description provides a brief summary of the most important characteristics of the program and the learning outcomes expected of the student to achieve, proving whether he has made the most of the available opportunities. It is accompanied by a description of each course within the program

Muthana University / College of Education for Human Sciences	83.Educational institution
Department of English Language	84.Scientific Department / Center
Student Expected Learning Outcomes Program	85.Name of academic or vocational program
Bachelor of Education in English Language and Literature	86.Final Certificate Name
annual	87.Academic System : Annual / Decisions / Other
Quality Assurance and Social Performance Standards	88.Accredited Accreditation Program
	89.Other external influences
18-3-2024	90.History of the preparation of the description
91.Course Objectives	

The short story is one of the ancient and modern educational methods that affect the teaching and learning process, as it is a global literary art that has been used in the teaching process since ancient times. Therefore, the aim of teaching the short story in the English language is to increase the linguistic and literary stock of vocabulary and literary methods that help students to write and create, as well as to learn about the culture of the acquired language through their study of separate stories dating back to different periods of time and extracting lessons and human lessons in these stories.

### 92. Required Program Outcomes and Teaching, Learning and Assessment Methods

- A-A cognitive objectives.
  - A1. Developing students' language skills
  - A2. Expanding students' perceptions about English language and literature
  - A3. Identify the art of prose and the characteristics of the short story and its contribution to promoting creative thinking and critical analysis
  - A4. Learn about the development of fiction and its relationship to the psychological, political and social dimensions.
- B Skills objectives of the program:
- B1 Acquisition of new vocabulary and synonyms.
- B2 Enhancing reading and comprehension skills in the English language.
- B3 Developing the analytical ability of situations, symbols and people.
- B4- Enable students to speak, interact, discuss and conclude.

# Teaching and learning methods

- Read narrative texts and learn about the writer's style
- Adopting the communicative method in teaching and learning.
- Discussion, questioning and interactive dialogue.
- Use modern illustrative aids, for example, (Data Show and micro lecture) to clarify the important points of the lesson.
- Review and discussion to clarify the similarities and differences between the selected stories.

#### Evaluation methods

- Daily evaluation of attendance and active participation.
- Ask oral questions and conduct written quizzes and discuss them in class

- Conduct a presentation to students
- Conducting Semester Exams

### C- Emotional and value goals:

- C1- Focusing on the details of the scientific material.
- C2- Active participation in discussion and dialogue.
- C3- Expressing an opinion according to logical analysis.
- C4- Respect for the opinion and the other opinion.

#### Teaching and learning methods

- Adopting the communicative method in teaching and learning.
- Discussion and interactive dialogue
- Review and discussion to clarify the most important common points to enhance the creative and deductive thinking of the student.
- Forming student groups to assess their linguistic and analytical capabilities and encourage team spirit and teamwork.

#### Evaluation methods

- Daily evaluation of attendance and active participation.
- Ask oral questions and conduct written quizzes and discuss them in class
- Identify distinguished student groups and reward them.
- Conducting Semester Exams
- d. General and qualifying skills transferred (other skills related to employability and personal development).
  - D1- Developing effective teaching, management and communication skills.
  - D2- Proficiency in the four skills of the English language (reading, writing, listening and speaking)
  - D3- Acquiring life experiences that enable the student to learn patience, perseverance and the art of dealing with others
  - D4- The possibility of effective change and finding solutions to the problems emanating from the work environment

# Teaching and learning methods

- Adopting the communicative method in teaching and learning.
- Discussion and interactive dialogue

- Use modern illustrations, for example, (Data Show) to illustrate the important points in the lesson
- Review and discussion to enhance the student's creative and deductive thinking.

### **Evaluation methods**

- Daily evaluation of attendance and active participation.
- Ask oral questions and conduct written quizzes and discuss them in class
- Forming student groups for the purpose of discussing literary works in the curriculum.

### 119. Objectives of the Academic Program

- Graduating qualified professors in the field of specialization ( teaching ) equipped with good teaching skills.
- B Development of teaching and educational staff in the field of specialization teaching English.

Developing the academic and educational capabilities of human resources in a way that contributes to the development of students' language abilities in -C Secondary stages.

D Developing research aspects in the field of linguistic and educational studies.

### 120. Required Program Outcomes and Teaching, Learning and Assessment Methods

### A-A cognitive objectives.

- A1- Memorizing or remembering information and perceiving it
- A2- Comprehension and comprehension, i.e. 1- Developing mental abilities and skills2- Translation3- Interpretation4- Inductive estimation
- A3- Application: The use of abstract ideas in new and concrete situations0
- A4- Analysis: Any analysis of the material into its constituent elements and tracking the relationships between the parts and the way they are organized.
- A-5- Installation: Placing the elements and parts so that they are one whole 0 A6-Calendar

# B - Skills objectives of the program:

- B1.Providing students with specialized terminology and information.
- B2.Students absorb educational information, concepts and terminology.
- B3 .Apply concepts and information in the field of specialization in practical aspects.
- 4- Developing the linguistic wealth of students and providing them with many words and structures.

# Teaching and learning methods

- 1- The traditional lecture method
- 2- E-learning method using PowerPoint and teaching methods.
- 3- Method of questioning and discussion

### 4- Brainstorming method

#### **Evaluation** methods

Modern methods and strategies that depend on the effort of the teacher and the learner

- 1- Daily and monthly oral and written exams
- 2- The method of application by the student himself
- 3- Open Book Exam
- 4- Research and Reports
- C- Emotional and value goals:
- A1- Reception: The student's desire to receive the lesson and pay attention to it.
- C2- Response: Beyond mere attention to the phenomenon in an active and effective manner.
- C3- Valuation (evaluation) Evaluation of the learner and his appreciation of any phenomenon and behavior and the lesson itself and its role in daily life.
- C4- Organization: The teacher represents the lesson sequentially, determines the mutual relationships between them, and establishes dominant values.

### Teaching and learning methods

- -Traditional lecture
- Electronic lecture using PowerPoint
- -Practicality
- The method of explanation and discussion is individual and groups
- The student joins, for example, a seminar on how to teach the language in the English language in a proper way.
- A group workshop between the teacher and students in which they explain certain patterns using visual writing means.

#### Evaluation methods

Evaluation is carried out through oral and written examinations and evaluation of research carried out by groups.

- 10. General and qualifying skills transferred (other skills related to employability and personal development).
- D1- Perception: Understanding the meaning and formulating a concept.
- D2- Application: Use of information in a new situation.
- D3- Dividing the information into parts to fully understand it .
- D4- Synthesis: Gathering ideas and forming something new.

- d. General and qualifying skills transferred (other skills related to employability and personal development).
  - D1 . Teaching skills acquired from seminars and developmental courses in the field of continuing education in the mental, physical and emotional aspects.
  - D2 .Benefiting from scientific experiments and studies in disciplines similar to developed countries and similar to the environment

Educational in a way that contributes to its development in all aspects.

- D3--Developing the student's mental abilities
- D4- Developing skill abilities and dealing with students' levels.

Teaching and learning methods

- Explanation, direct delivery and presentation by means of illustration
- Discussion during the lecture
- Use interrogation methods and implicit questions.

**Evaluation methods** 

- -Daily testing and reports
- -Monthly tests
- Final exams

# 121. Program Architecture

Credit	Hours	Course Name	Course or Course Code	Grades

Ministry of Higher Education and Scientific Research / Muthanna University	1. Educational institution				
Faculty of Education for Human Sciences	2. Scientific Department / Center				
English Language in methods and approaches teaching	3. Name of the academic or professional program				
Bachelor of English Language	4. Name of the final certificate				
annual	5. Academic System: Annual / Decisions / Other				
None	6. Accredited Accreditation Program				
Ministry of Higher Education and Scientific Research / Ministry of Education	7. Other external influences				
2024/3/20	8. Date of preparation of the description				
9. Objectives of the academic program					
- Qualifying students to master the English language with	all its				

comprehension and comprehension, speaking, reading, and writing.

linguistic skills and cultural background.

- Preparing students who are proficient in the four skills of the English language:

- Preparing and training students who are able to write scientific and applied research in the English language and publish them in scientific journals.
  - Enable students to master critical and literary analysis, translation and applied and theoretical language teaching.
- Familiarity with a variety of teaching methods of modern teaching methods such as films, videos, language and phonetics laboratory and others

It qualifies them to teach English effectively and effectively.

- Encourage a critical understanding of the thought and cultures of the English-speaking world, and open channels of cultural dialogue with nations and peoples English speaker.

# 10. Required Program Outcomes and Methods of Teaching, Learning and Assessment

A-A Knowledge Objectives

A-1Learn the old and modern methods
A-2 Speak good language
A3The role of the teacher in each class and its negatives and positives
A-4 Scientific material

### B- Skills objectives of the program:

B1 Listening

**B2** Speaking

B 3 writing

### Teaching and learning methods

- Clarification and explanation of study materials by teaching staff using different classroom techniques to attract attention

### Student

S.

- Traditional methods by simplifying the scientific material, the method of lecture.
- Encourage students to learn and self-explore knowledge by visiting libraries and websites

To obtain additional knowledge of the study materials.

- Improving students' skills in critical and creative thinking by providing them with additional educational courses for the subjects.

### **Evaluation Methods**

- Monthly, quarterly and final written and oral exams.
- Rapid exams . Quizzes)
- Setting grades for the assigned home duties.
- Writing reports, masters and presentations.
- Specific grades for homework by writing self-reports on the topic of the lecture.

C- Emotional and value goals:

C-1 Participation of students in activities

C-2 Encourage students to participate in periodic discussions in the lecture

C-3 Knowledge and understanding of the importance of the English language C-4 Encouraging students to expand their language culture

Teaching and learning methods

- Encourage students to form discussion groups during lectures to discuss topics that require thinking and analysis

And exchange and accept the opinions of the other party.

- Group learning in the spirit of one team.
- Field visits to some model schools or screening films and videos to convey a realistic image

And learn about the culture of countries that speak English.

- Providing mini-lectures by the student.
- Always presenting lessons in different styles and in a variety of ways using suspense and one of those methods is the story style

Which is considered the most important way to support emotional goals, especially in literary materials.

- d. General and transferable skills (other skills related to employability and personal development).
  - D-1 Classroom management and control skills.
  - D-2 The skill of linking the material to reality using examples of reinforcement from daily life.
  - D-3 Evaluation skill.
  - D-4 The skill of linking material to reality using examples of reinforcement from daily life.

Teaching and learning methods

- Sending students for training in training institutions and institutes.
- Inviting some professional bodies and organizing meetings with students.
- Employing curricula in coordination with the departments with which he will deal.
- Develop curricula by the department similar to the work environment.
- Encourage critical thinking and judgment.
- Training students to solve problems, and create a fertile environment for creativity.

**Evaluation Methods** 

- Provide criteria for evaluating the selection process by linking the results of the selection process with the evaluation of merit-based performance.
- Provide fair, correct, good-faith and impartial criteria against which to assess.
- Apply continuous evaluation procedures based on the results of the evaluation.

	Program Stru	ecture			
Credit Hours		Course Name	Course or Course	Stage of Study Level	
practic al	theor etica 1		Code	/ Year	
	6	Teaching methods	/	Third Stage	

11. Planning for personal development

- Employing innovative reinforcement methods to enhance students.
- Exchange of experiences with professors who teach the same courses in other colleges and other universities.
- Employing new teaching methods.
- Participate in the evaluation and development of the curriculum and analyze it into its various elements.
- Periodic evaluation of the course description through various feedback by teachers and students.
- Familiarity with the skills and techniques of rapid access to knowledge and information such as computers and the Internet and others.

- 12. Admission criterion (setting regulations related to enrollment in the college or institute)
  - To meet the admission requirements determined by the Ministry of Higher Education and Scientific Research .
  - To be willing to study in the department of his choice.
  - Must have a certificate of completion of preparatory school or its equivalent from other countries.
  - To pass the aptitude test and personal tests and tests of readiness to work in the teaching profession -
  - Passing the medical examination.

### 13. Main sources of information about the program

- Curricular books and courses.
- For up-to-date academic research sites on the Internet, and subscription to electronic databases

Area of specialization.

- Scientific references and books.
- Availability of hardware, equipment, materials and software appropriate to the specialization.
- The availability, diversity, modernity and coverage of books and periodicals for all areas of knowledge in the specialization.
- The existence of an electronic system for managing educational content and the availability of electronic materials.

# Course Description Form

### **Course Description**

This course description provides a brief summary that inspired the course characteristics and learning outcomes expected of the student to achieve, proving whether he or she made the most of the available learning opportunities. It must be linked to the program description.

Muthana University / College of Education	1. Educational institution
English Language	2. Scientific Department / Center
Teaching Methods / Third Approaches and Methods of Teaching	3. Course Name/Code
Lecture Hall	4. Available attendance formats
annual	5. Semester/year
96 hours (	6. Number of academic hours (total)
2024/3/20	7. Date of preparation of this description
8. Course Objectives	

- Identify the different teaching methods, their features and determinants, and train to choose the appropriate methods

According to educational

positions.

- Distinguish the difference between the methodology, vocabulary, types of vocabulary and Bloom's classification.
- Identify the curricula and their types
- Contribute to the professional preparation of English language students, and enable them to teach English in

Middle and secondary stage effectively.

# 9. Course outcomes and methods of teaching, learning and evaluation

### A- Knowledge Objectives

A-1 Ancient and modern methods of teaching.

A-2 The role of the teacher or teacher in each method, its disadvantages and advantages/objectives.

A-3 Teaching steps for each method.

A-4 Students know the types of curricula

designed and methods of construction, teaching

and evaluation

A5Difference between Methodology,

Vocabulary, Types of Vocabulary and Bloom's

Classification

A-6 Students' knowledge and understanding of language skills and how to employ them in the lesson.

### **B-** Course Skill Objectives

B1 - Listening.

B2 - Speech.

B3 - Reading.

B4 - Writing.

## Teaching and learning methods

- The traditional method (lecture delivery) and the method of individual work, lecture and discussion.
- Teaching using grade technology, presentations.
- Group and collaborative learning.
- Presenting samples of real dialogues to students.

### **Evaluation Methods**

- Paper and pen test, editorial test.
- Daily testing
- Use of short oral daily tests.

### C- Emotional and value goals

- C.1 Better understanding and use of information.
- C-2 The student should listen attentively to the teacher's explanation of the course during the lecture.
- C-3 Interaction as groups or with the professor.
- C-4 The student should appreciate the role of teaching curricula and methods in delivering the scientific material after the professor discusses it.

### Teaching and learning methods

- 1. View lessons and dialogues using D Show, as well as Point Power
- 2. Encourage students to write self-reports and criticism on the teaching methods and methods used and compare them from

Terms of positive and negative aspects.

3- Participation of students in providing various classroom lectures according to ancient and modern teaching methods and methods using slideshow or video program.

4. Field visits to middle and high schools to help hone students' skills and enhance responsibility

Scientific in expanding students' perceptions.

5. Urging students to learn about the most important modern and contemporary methods used in teaching language courses

English at all stages through the use of modern technology and websites.

### **Evaluation Methods**

Exam (oral and written) and daily exam

- d. Transferred general and qualification skills (other skills related to employability and personal development).
- D-1 Communication and speaking using the English language.
- D-2 Reading and reading in the field of academic knowledge development, general culture and in the field of education.
- D-3 Writing continuously.
- D-4 Attending seminars, educational meetings, courses, training workshops, exchange of visits and classes

Watching.

D5 - Continuous reading.

125. Required Program Outcomes and Teaching, Learning and Assessment Methods
A-A cognitive objectives.
A1- The student should know the concept of guidance.
A2- The student should explain the importance of guidance.
A3- The student should set a set of goals for guidance
A4- The student should analyze the types of guidance
A5- The student should conclude the importance of modern guidance
A6- The student should do and teach guidance in all aspects of his life.
B - Skills objectives of the program:
B1 – The student to devise radical solutions to address students' problems
B2 – To go beyond traditional solutions in the practice of extension work
B3 - The student is committed to wishing his skills through training and
continuous follow-up
Teaching and learning methods
1 Theoretical lectures
2 Giving practical lectures
3 Questions, answers and classroom interaction
Evaluation methods
1Development of oral and written tests
2 The extent of the student's commitment to attendance and discussion
3 Evaluating the student through his commitment to dress and proper form

- C- Emotional and value goals:
  - C1- The student should conclude the importance of the essay questions.
  - C2- The student should analyze the types of objective questions.
  - C3- The student should realize the relationship between counseling and the environment.
  - C4- The student should express his opinion on the role of guidance in human life.

Teaching and learning methods

- 1 Theoretical lectures
- 2 Giving practical lectures
- 3 Questions, answers and classroom interaction

**Evaluation methods** 

Achievement tests at the emotional level of the Krathol classification.

- d. General and qualifying skills transferred (other skills related to employability and personal development).
  - D1- The skill of classroom management and control.
  - D2- The skill of asking questions.
  - D3- Evaluation skill.
- D4- The skill of linking the material to reality using reinforcement examples from daily life

Teaching and learning methods

Using all methods and means that would create a student who enjoys a scientific method in the process of guidance, guidance and communication with the community, especially primary, middle and middle school students

**Evaluation** methods

Achievement tests of various types and levels.

126. Program Architecture							
Credit	Hours	Course Name	Course or Course Code	Grades			
practical	theoretical						
4		Educational Guidance	/	Third			

### 127. Planning for personal development

Enabling the student to be open to global cultures , which creates future opportunities to develop his capabilities at the professional, intellectual and social levels

# 22- Admission criterion (setting regulations related to admission to a college or institute)

- 1 The student must have completed his secondary education in the literary and scientific specialization
- 2. To have a real desire to join the department
- 3. Have a mark that affects his work as a teacher
- 4 Pass the personal interview

# 23- The most important sources of information about the program.

References and sources from books, research, studies, periodicals and various means of communication from the Internet and others in the subject of the foundations of education, measurement and evaluation in counseling and educational psychology.

	description

136. Objectives of the Academic Program

1Ability to communicate effectively in English

- .2Ability to understand and translate texts to and from English
- .3Ability to teach English effectively
- .4Identify the world's literary works and their intellectual and human heritage

.5Skill in writing texts in a sober academic style
.6Analysis and criticism of literary texts

137.Required Program Outcomes and Teaching, Learning and Assessment Methods

A- Cognitive objectives
A-1 Access to international literary texts of poetry, prose and theater
A-2 Ability to formulate sentences correctly
A-3 Assimilation of linguistic texts
A-4 Knowledge of linguistic concepts and their applications
A-5 Access to phonetic patterns and types

B- Skills objectives of the program
B - 1 Develop the skill of listening and speaking
B - 2 Develop the ability to write
B - 3 Develop the ability to analyze and understand texts from an academic perspective

Teaching and learning methods

Using the communicative method, discussion, question and answer, activating the role of the audio laboratory and other audiovisual means

Evaluation methods

Daily, monthly and final exams

- C- Emotional and value goals:
- C.1 Exposure to world cultures
- C.2Openness to other societies

# 150. Objectives of the Academic Program

- Graduating qualified professors in the field of specialization ( teaching ) equipped with good teaching skills.
- B Development of teaching and educational staff in the field of specialization teaching English.

Developing the academic and educational capabilities of human resources in a way that contributes to the development of students' language abilities in -C Secondary stages.

D Developing research aspects in the field of linguistic and educational studies.

## 151. Required Program Outcomes and Teaching, Learning and Assessment Methods

- A-A cognitive objectives.
  - A1- Memorizing or remembering information and perceiving it
  - A2- Comprehension and comprehension, i.e. 1- Developing mental abilities and skills2- Translation3- Interpretation4- Inductive estimation
  - A3- Application: The use of abstract ideas in new and concrete situations0
  - A4- Analysis: Any analysis of the material into its constituent elements and tracking the relationships between the parts and the way they are organized.
  - A-5- Installation: Placing the elements and parts so that they are one whole 0 A6-Calendar
- B Skills objectives of the program:
  - B1.Providing students with specialized terminology and information.
  - B2.Students absorb educational information, concepts and terminology.
  - B3 .Apply concepts and information in the field of specialization in practical aspects.
  - 4- Developing the linguistic wealth of students and providing them with many words and structures.

## Teaching and learning methods

- 1- The traditional lecture method
- 2- E-learning method using PowerPoint and teaching methods.
- 3- Method of questioning and discussion
- 4- Brainstorming method

### Evaluation methods

Modern methods and strategies that depend on the effort of the teacher and the learner

- 1- Daily and monthly oral and written exams
- 2- The method of application by the student himself
- 3- Open Book Exam
- 4- Research and Reports
- C- Emotional and value goals:
- A1- Reception: The student's desire to receive the lesson and pay attention to it.
- C2- Response: Beyond mere attention to the phenomenon in an active and effective manner.
- C3- Valuation (evaluation) Evaluation of the learner and his appreciation of any phenomenon and behavior and the lesson itself and its role in daily life.
- C4- Organization: The teacher represents the lesson sequentially, determines the mutual relationships between them, and establishes dominant values.

## Teaching and learning methods

- -Traditional lecture
- Electronic lecture using PowerPoint
- -Practicality
- The method of explanation and discussion is individual and groups
- The student joins, for example, a seminar on how to teach the language in the English language in a proper way.
- A group workshop between the teacher and students in which they explain certain patterns using visual writing means.

### **Evaluation methods**

Evaluation is carried out through oral and written examinations and evaluation of research carried out by groups.

- 10. General and qualifying skills transferred (other skills related to employability and personal development).
- D1- Perception: Understanding the meaning and formulating a concept.
- D2- Application: Use of information in a new situation.
- D3- Dividing the information into parts to fully understand it .
- D4- Synthesis: Gathering ideas and forming something new.
- d. General and qualifying skills transferred (other skills related to employability and personal development).
  - D1. Teaching skills acquired from seminars and developmental courses in the field of continuing education in the mental, physical and emotional aspects.
  - D2 .Benefiting from scientific experiments and studies in disciplines similar to developed countries and similar to the environment

Educational in a way that contributes to its development in all aspects.

- D3--Developing the student's mental abilities
- D4- Developing skill abilities and dealing with students' levels.

Teaching and learning methods

- Explanation, direct delivery and presentation by means of illustration
- Discussion during the lecture
- Use interrogation methods and implicit questions.

## Evaluation methods

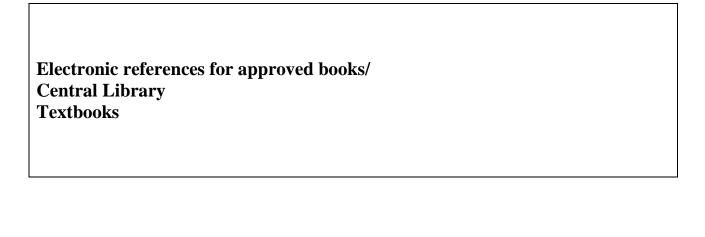

- -Daily testing and reports
- -Monthly tests
- Final exams

## 152. Program Architecture

Credit Hours		Course Name	Course or Course Code	Grades

#### 8. Course Objectives

This course aims to give the student a complete idea of the modern era (twentieth century) in literature and how the industrial revolution affected the crystallization of new literature for this period. The student studies a number of English novels of particular interest to William Golden and George Orwell.

9. Course Outcomes, Teaching and Learning Methods, and Assessment Methods

A. Knowledge and understanding

A1- Renewal in ideas

A2- Learning about the cultures of a different society

A3- Learn how to link the literary text to the era in which it was written

A4 .

A5 .

A6.

B - Course Skills Objectives

B1. Understand how to deal with different situations

B2 – Application of literary theories to the novel
B4 . Going through the experience of analyzing the literary text within different frameworks such as philosophical or societal
B5 .
B6.
Teaching and learning methods
Lectures – Text Discussions – Presentations – Short Film Screening
Evaluation methods
Written exams  Daily student activity in class
C. Emotional and value goals
A1 . Develop the student's skills through the linguistic formulations of a particular question or idea found in the text
A2 . Overcoming the difficulties facing the student in analyzing the literary text
A3. Identify the philosophical vision that aims to delight the mind.
A4 .
A5 .
A6.
Teaching and learning methods
Questions, Discussions, Lectures
Evaluation methods
Correction of students' written and oral answers
d. General and Transferable Skills (Other Skills Related to Employability and Personal Development)
D1 . Use the information and expertise in the text in reality
D2 . Proficiency in English speaking
D3 . Develop skills and gain experience through listening and speaking
D4 . The skill of communicating with the rest of the students through the use of verbs in the text

D5 .

2024	7. Date of preparation of this
	description
	8. Course Objectives
	Helping the student teacher to identify the
	components of the school and institutional
	system, and the systemic interaction between
	these components
	Acquire the student-teacher and trainee a real
	understanding of his abilities and professional
	qualities, and work to develop them to the
	maximum extent possible.
	Linking theory and practice by putting into
	practice what the student teacher and trainee
	have learned in the theoretical aspect of the
	courses studied in the college.
	Testing the extent to which the student teacher
	and trainee are able to master the scientific

material that he teaches and trains on, and the extent of his ability to develop it during the education and training process and thus increase understanding of the subject of specialization.
Respect the teaching profession and the services related to it, appreciate its employees and form positive attitudes towards it.
Assist the student-teacher and trainee to acquire competencies and professionalism that enable him to successfully perform currency in the field of personal qualities, teaching, training, evaluation of student growth and diversity in educational activities of interest to students

# 10. Course Outcomes and Methods of Teaching, Learning and Assessment Cognitive goals

- A1- Study and review the different methods in teaching language skills
- A2- Developing students' skills in teaching various language skills
- A3- Developing students' skills in controlling the class and dealing with individual differences
- A4- Developing students' skills in learning evaluation
- A5- Developing students' skills in teaching planning

### Course skills objectives.

- **B1- Enabling** students to acquire basic teaching skills
- **B2-** Practical training of students on actual teaching in schools
- **B3- Apply modern teaching strategies**
- **B4-** Acquires the skill of social interaction

	Teaching and learning methods

Undergraduate Practicum Course	1- Required textbooks
English language textbook "English for Iraq"	-
A Course in Language Teaching : Practice and Theory. By Penny Ur	2- Main references (sources)
Books Articles on modern teaching methods of the English language	Recommended books and references
	(scientific journals, reports,)
All sites dealing with modern teaching methods of English	Electronic references, websites

- Continuous review of the objectives of the course to update them continuously
- Making continuous adjustments to the vocabulary of the course to introduce modern topics related to the methods of teaching English and taught in international universities to keep pace with the development in this field.
- Work on the preparation of educational materials and videos dealing with modern teaching of the English language and hosting distinguished teachers with experience to provide training lessons for students.
- Investigating students' opinions regarding the course and its vocabulary and collecting and evaluating information for the purpose of making adjustments that would develop the course

# **Academic Program Description**

This academic program description provides a brief summary of the most important characteristics of the program and the learning outcomes expected of the student to achieve, proving whether he has made the most of the available opportunities. It is accompanied by a description of each course within the program

2024/3/20	163. History of the preparation of the description

## 164. Objectives of the Academic Program

- 1 Preparing a generation of teachers for intermediate and preparatory education with the ability to teach English in these educational seminars
- 2- Preparing graduates who use the English language and are proficient in the four skills: comprehension and comprehension, speaking, reading, writing
- 3 Enable students to review, consolidate, develop and deepen the language skills they have acquired in the previous academic stages
- 4 Enable students to rely on themselves in understanding what they read and hear in English outside the limits of the previous study
- 5 Qualifying female students highly qualified to continue postgraduate programs
- 6 Creating a balanced student personality behaviorally and emotionally

## 165. Required Program Outcomes and Teaching, Learning and Assessment Methods

A-A cognitive objectives.

A1- Cognitive objectives

A2- Speak a proper language

A3- Distinguish between vocabulary similar in use

A4- The ability to understand literary and comprehensive texts

A5-

A6-

- B Skills objectives of the program:
  - B1 To have the ability to think andabsorb
  - B2 n The student has the ability to write
  - B3 To participate in discussions in the classroom.

Teaching and learning methods

1Traditional methods by simplifying scientific material. Lecture method 2- Engage students in thinking by asking questions.
Evaluation methods
.1 Written tests.
2. Oral tests
C- Emotional and value goals:
C1- The student should be motivated to solve the assignment
C2- The student should discuss seriously in the lecture
C3- Interaction as groups with the professor
C4-Conclusion

There is a plan to develop the course by developing teaching methods and not repeating the same method every year and transferring students to prepare reports on each grammatical aspect that is explained and discussed in the classroom so that a conscious generation can be created in scientific research and development
